Last time a refresh was started

Refresh this table to show the latest 'Refresh Started' and 'Refresh Completed' times

The type of refresh taking place (not all venues have all options enabled)

You will very rarely need to use this page on a day to day basis as it is set up to run automatically when you join Hopt. There may be some occasions when you will want to 'force' a refresh using the green buttons:

- If you have made changes to your tables on EPOS Now, you may need to refresh them to make them appear in the app immediately.
- If you have made changes to your menu that need to be pushed to the app immediately.

The best rule to follow is LOOK AT THE REFRESH COMPLETED DATE AND TIME. If your changes aren't showing, it may be that there hasn't been an automatic refresh for some time. In this case, click the green button. If you are still experiencing problems, contact support@hopt.app and we will take a look at your settings.
